

# SuspendIt<sup>®</sup> Anhydrous

A Self-Emulsifying Anhydrous Oral Suspension Vehicle With Extended Stability

PCCA # 30-5176

## SuspendIt<sup>®</sup> ANHYDROUS

For better tasting and longer lasting oral suspensions.

### UNIQUE CHARACTERISTICS

Ideal for active pharmaceutical ingredients (APIs) that are unstable in water or have incompatibilities in some aqueous vehicles, SuspendIt Anhydrous is unlike any other oral suspension vehicle:

- Self-emulsifying properties may improve the solubility, dispersibility and possibly enhance bioavailability of drugs with poor water-solubility.
- Thixotropic effect allows rapid redispersion of APIs upon agitation with potentially minimal sedimentation.
- Extended BUDs for pharmacy and patient convenience.
- May use with hydrophilic or lipophilic drugs.
- Naturally sweetened with monk fruit.
- Preservative free.
- Offers improved palatability from traditional oil vehicles.
- Mixes easily with water or juice.
- Ideal for use in pediatrics, including neonates.
- Appropriate for vet use (assess to ensure appropriate for the animal's species).
- Can be used in polyurethane nasogastric (feeding) tubes.

# SuspendIt<sup>®</sup> Anhydrous

## COMPOUNDER BENEFITS

- **Broad application**

SuspendIt Anhydrous is compatible with a broad number of APIs. It is suitable for pharmacies that compound for pediatrics, hospice and geriatric patients, as well as for veterinarians.

- **Improved quality**

Its unique self-emulsifying system may improve solubility, dispersibility and absorption of APIs, while its thixotropic effect offers rapid redispersion of APIs with minimal sedimentation.

- **Maximized efficiencies**

Longer default BUDs save time and may increase operational efficiencies for compounders who create anticipatory compounding and batches.

- **Increase patient compliance**

It's natural sweetness and pleasant mouth feel may improve patient satisfaction and compliance. Combined with an ability to mix with water and juice (at time of administration), SuspendIt Anhydrous may help medication taste better for children, pets and other patients.
